## SIX CONNEXOR Reporting (IBC)

### 1. Introduction

SIX is implementing a new technology for user access to web applications where users will be able to have one single identity to access several applications provided by SIX and BME.

The new technology will be implemented in the **Production environment** on **20 September 2025**.

### 2. Objective

This UserGuide aims to provide instructions to the existing users on how to access CONNEXOR Reporting after the one single identity access is implemented at SIX.

### 3. User actions upon the migration to CIAM

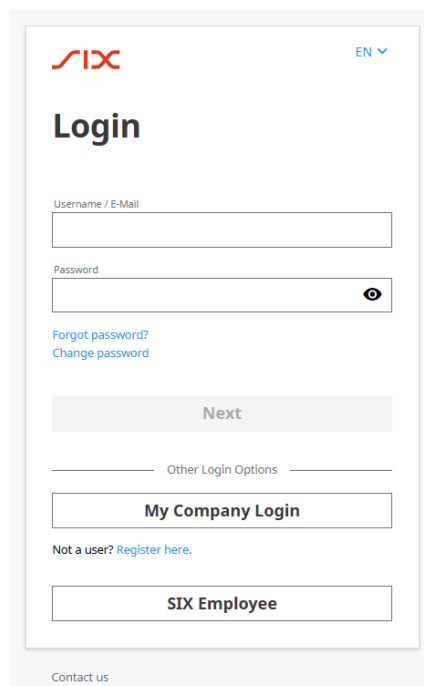

**During the migration, all user passwords will be reset.**

All existing users will need to set a new password for the production URL of:

– Connexor (IBC) – <https://ibc.six-swiss-exchange.com>

#### 3.1 Login with username/e-mail and password

The above URL will take the user to the login page.

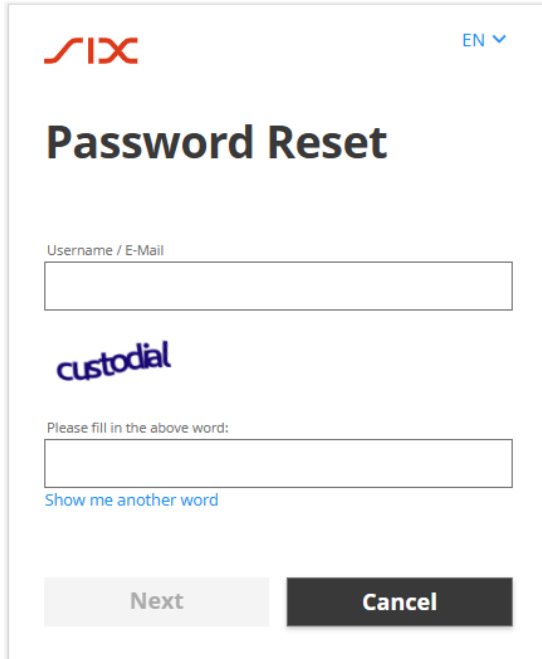

The screenshot shows the SIX login interface. At the top left is the SIX logo, and at the top right is a language selector set to 'EN'. The main heading is 'Login'. Below this are two input fields: 'Username / E-Mail' and 'Password'. The password field has an eye icon for toggling visibility. Below the password field are two links: 'Forgot password?' and 'Change password'. A 'Next' button is positioned below these links. Underneath is a section for 'Other Login Options' containing a 'My Company Login' button. At the bottom of this section is a link: 'Not a user? Register here.' Below that is a 'SIX Employee' button. At the very bottom of the page is a 'Contact us' link.

## UserGuide SIX SIS AG

### SIX CONNEXOR Reporting (IBC)

- To reset the password, the user must select the field “Forgot Password?”.

The screenshot shows a web form titled "Password Reset" with the SIX logo in the top left and a language dropdown set to "EN" in the top right. The form contains a text input field labeled "Username / E-Mail", the "custodial" logo, a text input field labeled "Please fill in the above word:", a link "Show me another word" below the second field, and two buttons at the bottom: "Next" (disabled) and "Cancel" (active).

- The user needs to type their corporate e-mail address and follow the instructions.
- Upon confirmation, the user will receive an e-mail with a link to set a new password:
  - Note that the new password must follow the password policy of SIX, i.e., **at least 12 characters, one uppercase, one lowercase, one number, one special character and not a previously used password**. The password may not contain the username or parts of it.
- The user can see the typed password by pressing  on the right-hand side of the password field. Once the user confirms the password, it is successfully changed.

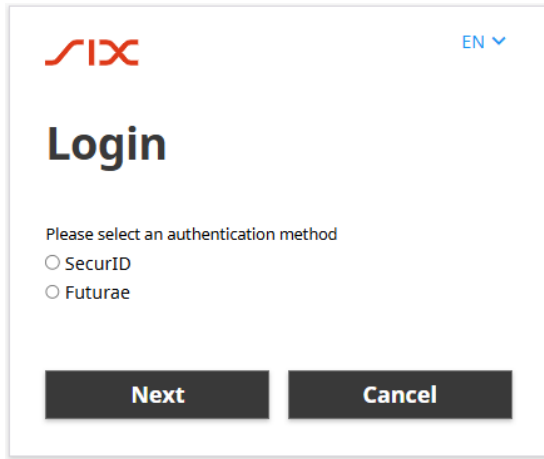

**Note that this step is required only once, whenever the user accesses one of the SIX SWS web applications. The info will then be propagated to all SIX SWS applications.**

SIX SWS applications require 2FA, i.e., once the user types in a valid corporate e-mail address and password, they will be redirected to the following page, where another authentication method is required:

## SIX CONNEXOR Reporting (IBC)

The screenshot shows the SIX login interface. At the top left is the SIX logo, and at the top right is a language selector 'EN' with a dropdown arrow. The main heading is 'Login'. Below it, the text reads 'Please select an authentication method'. There are two radio button options: 'SecurID' and 'Futurae'. At the bottom, there are two dark buttons: 'Next' and 'Cancel'.

- The user has to select **Futurae** (device registration only):
- The user will receive an authentication code to their inbox:

The screenshot shows the 'Check your Inbox' page. At the top left is the SIX logo, and at the top right is a language selector 'EN' with a dropdown arrow. The main heading is 'Check your Inbox'. Below it, there is a message icon and the text: 'We have sent you an authentication code. We want to make sure it is you.' Underneath, the heading 'Authentication code' is followed by six input boxes for the code. Below the input boxes is a link that says 'Send me a new code'. At the bottom of the page, there is a 'Contact us' link.

## UserGuide SIX SIS AG

### SIX CONNEXOR Reporting (IBC)

- Once the code is completed in the browser, a QR code will be shown for the user to scan with their phone:

Note that Futurae is segregated between access to a PROD environment and a QA environment.

#### 4. Other features in CONNEXOR Reporting login

Besides the login options mentioned previously, the user can perform other actions in the CONNEXOR Reporting login page.

##### 4.1 Changing password

If a user did not forget the current password but wants to change it, they can do it by clicking the "Change Password" link that will take them to the page shown below.

Upon confirmation, an e-mail will be sent to the user confirming the password change.

## SIX CONNEXOR Reporting (IBC)

**SIX** EN

### Change Password

The password has to comply with the following password policy:

- at least 12 characters long
- at least one upper case character
- at least one lower case character
- at least one special character
- must not be a previously chosen one

Current password

New Password

Confirm password

Next Cancel

### 4.2 Registering new users

A user can register themselves by clicking the field "Register here".

They will be taken to a page with a form to be filled in for submission.

**SIX** EN
